DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gidwani et al. US 6,828,334 (Gidwani).

Claims 1-10 are drawn to a pharmaceutical composition comprising a solubilizing agent selected from crystalline methylated α -, β -, and γ -cyclodextrin, or mixtures thereof, and a pharmaceutically active agent. Claim 2 limits the cyclodextrin. Claims 3 and 10 limit the active agent. Claims 4-9 limit the type of formulation (i.e. oral, parenteral, etc.)

Gidwani teaches a pharmaceutical composition containing fenofibrate in the form of an inclusion complex with methylated beta cyclodextrin (Example 6). The inclusion

complex can be administered as pharmaceutical formulations in form of tablets or in the form of granules inside a capsule (column 5, lines 20-45).

Gidwani differs from the instantly claimed invention in that 1) Gidwani is silent on the use of a crystalline cyclodextrin and 2) Gidwani does not teach liquid formulations.

Mere recitation of newly-discovered function or property (i.e., physical form), inherently possessed by things in prior art, does not cause claim drawn to those things to distinguish over prior art; Patent Office can require applicant to prove that subject matter shown to be in prior art does not possess characteristic relied on where it has reason to believe that functional limitation asserted to be critical for establishing novelty in claimed subject matter may be inherent characteristic of prior art; this burden of proof is applicable to product and process claims reasonably considered as possessing allegedly inherent characteristics. Patent and Trademark Office does not have facilities for examining and comparing applicant's various claimed crystalline forms with the prior art, and thus applicants have the burden of persuasion to make some comparison between materials in order to establish unexpected properties crystalline forms of methylated beta-cyclodextrin. Formulation of the composition of Gidwani into a cream or liquid is well within the purview of one of ordinary skill in the art.

Conclusion

4. Claims 1-10 are pending. Claims 1-10 are rejected. No claims are allowed.
